

Benefits of PowerStrips™

- PowerStrips are listed with the FDA as a Class 1 Medical Device and it is also classified as an OTC (over the counter) product.
- PowerStrips contain an adhesive layer with active ingredients and an outer layer with a proprietary herbal blend that also contributes to the temporary relief of minor pain.
- They can be worn for up to 48 hours and can be carried or mailed anywhere.

POWERSTRIPS™

 CLASS ONE
Medical Device

HOW POWERSTRIPS DELIVER PAIN RELIEF

PowerStrips contain germanium – an element with optical properties conduct heat, much the same as a glass prism conducts white light. Germanium bends heat from the body and the environment back toward the area where the PowerStrip is applied.

Germanium also breaks the heat into component parts, just as a prism separates white light into the colors of the spectrum. It's the "long wave" component of heat that's most beneficial for pain relief. As long wave heat penetrates affected parts of the body (up to 10 centimeters as demonstrated by infrared photography), it causes blood vessels in the area to dilate, increasing blood flow and natural warmth. This dilation works in combination with other complementary biochemical and neurological processes that contribute to pain relief while the PowerStrip is in place.

PowerStrips also contain capsaicin (Cap-SAY-sin), a natural counter-irritant (derived from hot peppers such as cayenne or chili peppers) that creates short-term relief from minor aches and pains when applied topically. In PowerStrips, capsaicin works together with germanium to deliver short-term relief, while the germanium helps to create the deep, lasting heat that enables the PowerStrip to work for longer periods of time.

KEY INGREDIENTS

The key ingredients in PowerStrips are: Germanium, Korean Red Ginseng, Alpha-3 Concentrated Marine Phytoplankton, and Capsaicin.
