

# SOLARSTRIPS™

## Benefits of SolarStrips™

- 37.5mg of concentrated marine phytoplankton
- Exclusive blend for maximum nutrition
- Proprietary process for highest bio-availability
- Great taste experience with the convenience of a dissolving breath strip
- Can be carried or mailed anywhere

Each SolarStrip delivers 37.5mg of concentrated marine phytoplankton (FYE-toe-plank-ton), the world's oldest and most nutritionally complete whole food source. Marine phytoplankton contains all of the amino acids, trace minerals, vitamins, essential fatty acids, phospholipids and antioxidants the body requires to help maintain optimum health.

The concentrated blend of wild phytoplankton species found in SolarStrips is farmed exclusively for ForeverGreen. Our proprietary process gently and naturally ruptures the silica cell walls without the use of heat, freezing, or chemicals. This allows the nutritional essence of the phytoplankton to become bio-available for human consumption.

Designed to dissolve easily on the tongue and create a pleasant taste experience, SolarStrips bring you a powerful nutritional boost with the convenience of a breath strip.
